Policy analysis and implementation will be extremely challenging given the nonconvexities in the human-environment system that will be enhanced by tipping elements, as well as the need to handle intergenerational justice and interpersonal equity over long periods and under conditions of uncertainty. A rigorous study of potential tipping elements in human socioeconomic systems would also be welcome, especially to address whether and how a rapid societal transition toward sustainability could be triggered, given that some models suggest there exists a tipping point for the transition to a low-carbon-energy system. It seems wise to assume that we have not yet identified all potential policy-relevant tipping elements. Travis Maddox, lean, The new Abby Abernathy is a good girl.
